› Professional Summary

Computer Science undergraduate with hands-on experience in Artificial Intelligence, Machine Learning, and Data Science. Skilled in developing AI-powered applications, intelligent agents, and predictive models using Python and modern AI frameworks. Proficient in building end-to-end solutions, from data preprocessing and model development to deployment and API integration. Passionate about solving real-world problems through AI, with strong analytical, problem-solving, and collaborative skills. Eager to contribute to innovative teams while continuously expanding expertise in AI engineering and intelligent systems.

› Education

- B.Tech University of Engineering and Management, Kolkata**
Bachelor of Technology in Computer Science Engineering
Specialization: IoT • Blockchain Technology • Cyber Security
CGPA: 8.4/10
- CBSE Barasat Indira Gandhi Memorial High School, Kolkata**
Central Board of Secondary Education, Science
Percentage: 74%
- CBSE Narayana Group of Schools, Kolkata**
Central Board of Secondary Education
Percentage: 88%

› Projects

Cold Email Generator *AI-Powered Chrome Extension for Automated Job Outreach*
Python • LangChain • Chrome Extension • Gmail SMTP • PDF Parsing • LLM

- **Developed** an AI-powered Chrome extension that extracts job postings from web pages and automatically generates personalized cold emails using resume context and LLM-based prompt engineering. Integrated PDF resume parsing and Gmail SMTP automation to streamline the end-to-end job application workflow, reducing manual effort from minutes to seconds.

Audit AI *AI Agent for Creator Growth & Content Audit*
Python • LangChain • LLM • Prompt Engineering • Streamlit

- **Built** an LLM-powered AI agent that automates influencer content audits by analyzing niche positioning, audience engagement, and content performance. Generated personalized audit reports with AI-driven reasoning and actionable growth recommendations, enabling creators to make data-driven content strategy decisions.

AQUASmart-IQ *IoT + Machine Learning Water Quality Monitoring System*
Python • TensorFlow • IoT • Machine Learning • NumPy • Pandas

- **Engineered** an IoT-based water quality monitoring system that continuously measures pH, turbidity, and temperature for aquaculture. Combined real-time sensor data with machine learning models to achieve

96.77% prediction accuracy, enabling proactive water quality assessment while replacing traditional post-mortem analysis.

Brand Locator

Geolocation Platform for Influencer Brand Discovery

Python • Flask • OpenStreetMap • Geolocation APIs

- **Developed** a geolocation-based web platform using OpenStreetMap that enables influencers to discover nearby brands through location-aware business search and amenity filtering. Automated the brand discovery process, significantly reducing manual research and accelerating influencer-brand collaboration opportunities.

▸ **Skills** _____

Programming Languages: Python • Java • MySQL

Frameworks: TensorFlow • Keras • Scikit-learn • Pandas • NumPy • Flask • Streamlit • LangChain

Data Analytics: Power BI • Tableau • Excel

Developer Tools: Git • GitHub • Google Colab • Jupyter Notebook • Anaconda

Core Concepts: Machine Learning • Data Analysis • DSA • DBMS

Domains: AI/ML • Data Science • Backend Development

▸ **Certifications** _____

- | | |
|---|-------------------|
| ▸ Python for Data Analysis | LinkedIn Learning |
| ▸ Learning Data Analytics: Foundations | LinkedIn Learning |
| ▸ Data Analytics Job Simulation | Deloitte (Forage) |

▸ **Honors and Awards** _____

Finalist

Aegis Graham Bell Award 2025

University of Engineering & Management (UEM), India

- Recognized as a finalist in the prestigious Aegis Graham Bell Awards for innovation in ICT.
- Contributed through research and project initiatives that supported UEM's national-level recognition.

▸ **Languages** _____

English (Professional) • Bengali (Fluent) • Hindi (Intermediate) • Japanese (Basic)
